This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Assistant Commissioner for Patents
 Washington, DC 20231

Response to a non-final Office action under 37 C.F.R. 1.111

Status of the prosecution

An RCE was filed in this application on 5/16/2005. The RCE was filed after a telephonic interview in the application at 9:00 on Tuesday, May 10 and the Submission filed with the interview amended claim 11 as discussed in the interview, amended other claims as required to bring them into conformance with amended claim 11, and included the arguments made by Applicants' attorney at the interview.

Examiner mailed a non-final Office action on 7/28/2005 in which he objected to the Specification as failing to provide proper antecedent basis for the claimed subject matter and as containing embedded hyperlinks. Claims 3,4, 7-9, 24, 25, and 28-31 were rejected under 35 U.S.C. 112, second paragraph as being indefinite and were for that reason not subject to an art rejection. Claims 2,5,6,10-23, 26, and 27 were rejected under 35 U.S.C. 102(b) as anticipated by U.S. Pat. No. 5,335,343, Lampson (hereinafter "Lampson").

Applicants are traversing the objection to the Specification as failing to provide proper antecedent basis for the claimed subject matter, are amending the Specification to render the hyperlinks inoperative, are amending claims 3,4,7-8,24, and 25 to overcome the rejection under 35 U.S.C. 112, second paragraph, are traversing the rejection under 35 U.S.C. 112 with regard to claims 9 and 30-31, and are traversing the rejection of claims 2,5,6,10-23, 26, and 27 under 35 U.S.C. 102(b).

Please amend the Specification as follows:**page 4, lines 19-30**

A common approach to solving bottlenecks caused by databases is by *replicating* the data base. As the name implies, a replicated data base has a copy at another location. When a set of replicated databases is set up, methods are specified for keeping the replications consistent. A replicated database may be a complete copy of the database it is a replication of, or a partial copy. In the latter case, the partial copy is termed a *materialized view*. A materialized view may be *read only*, in which case, it is kept consistent with the database it is a copy of, but cannot be updated by the user, or it may be *updateable*, in which case the data items in the materialized view may be updated and the updates are propagated to the database of which the materialized view is a copy. A replicated database system provided by Oracle Corporation, of Redwood Shores, CA, USA, is described in detail in the document *Oracle 8i Replication*, available in May, 2001 at <http://technet.oracle.com/doc/server.815/>

page 17, lines 6-10

FIG. 3 is a state diagram 301 for the states 303 entered by the coordinator and the states 305 entered by the cohorts during the two-phase commit protocol. The diagram is taken from a discussion of the two-phase commit protocol which could be found in May, 2001 at <http://ei.cs.vt.edu/~cs5204/fall99/index.html>
